FROM: Thomas Kluz 483, Lieutenant

SUBJECT: Written Reprimand

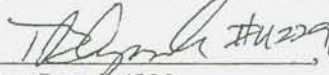

RE: Formal Head Count Procedures

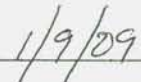

This constitutes a written reprimand for your failure to properly follow written policy on conducting formal head counts on July 21, 2008.

While a reprimand is not a severe form of disciplinary action, it is not intended to diminish the significance of the misconduct. The mildness of this punishment as compared to your error in judgment is intended to indicate our confidence that you will change this pattern of behavior and remain a professional employee.

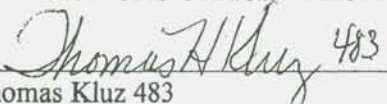

This action is in accordance with the Travis County Sheriff's Office Civil Service Regulations. 5.07. Disciplinary Actions, as all Corrections Bureau Captains are considered the designee for the Chief Deputy in these matters.

I HAVE PERSONALLY MET WITH LIEUTENANT KLUZ AND DISCUSSED THIS MATTER. I HAVE READ AND UNDERSTAND THE TERMS OF THIS ACTION INCLUDING THE APPEAL PROCESS.

 Corrections Officer
Thomas Lynch 4229

SUBJECT: IA case #2008-049 Thomas Lynch 4229, Corrections Officer

RE: Disciplinary Recommendation

I have reviewed the IA Case on Officer Thomas Lynch conducted by Deputy Marburger and agree with his findings. I have met with Lynch and he has admitted that his actions were wrong. He has assured me that this was an isolated incident and will not happen again. He is aware that this incident compromised his integrity and credibility as a Corrections Officer.

Officer Lynch has been employed with the Sheriff's Office since June of 2007 and has consistently received meets or exceeds standards ratings on his performance appraisals.

Therefore, I concur with Sergeant Holmes' recommendation that Officer Thomas Lynch be issued a written reprimand.

*I concur
Maj. D. Long

FROM: Lieutenant L. Glatt #488 

SUBJECT: IA CASE #2008-49

I have reviewed IA Case #2008-49. I concur with Investigator Marburger's sustained findings against Officer V. Donnelly #4292 for violation of TCSO Policy 3.1.2 - Staff Interaction with Inmates.

Officer Donnelly had received proper training on conducting Post Visuals and Meal Service. Less than one month prior to this incident, 5 minute FTO training was conducted on both of these topics. Officer Donnelly was present for these trainings.

Vicki Donnelly is no longer employed with the Travis County Sheriff's Office. I recommend a memorandum be placed in her personnel file making her ineligible for rehire.

18 November 08

TO: Lieutenant Lisa Glatt, 488

FROM: Sergeant Gwendolyn Holmes, 419 *GWH 419*

SUBJECT: Internal Affairs Case No. 2008-49

REF: Vicki Donnelly

I have reviewed the Internal Affairs investigation in regards to inmate Rachel Jackson's death which occurred on July 21, 2008. The investigation yielded adequate evidence to substantiate the allegations of then, Officer Vicki Donnelly's failing to adhere to TCSO policy 3.1.2 Staff Interaction with Inmates.

Post officers shall conduct a visual, observation of all inmates at least once hourly. This shall be accomplished by walk-through inspections (post visuals) of inmate living and work areas, by observing conditions and conversing with inmates. Observation shall be performed at least every thirty minutes in an area where inmates are known to be assaultive, potentially suicidal, mentally ill, or who have demonstrated bizarre behavior are confined. Observation shall be performed at least every fifteen minutes on all inmates who are placed on suicide watch or in a restraint device. Officers must ensure that they see a living, human body when conducting these visuals. Each of these post visuals shall be documented in the proper log.

It is my belief that Donnelly failed to adhere to TCSO Goals #8 Ensure the humane and lawful treatment of all people by her failure to take the appropriate actions upon finding an unresponsive inmate.

It should be noted that Donnelly resigned her position with TCSO on October 3, 2008.

Therefore, after careful review and consideration, I recommend that Donnelly not be considered for re-hire.

I learned that Jackson was arrested by the Austin Police Department on July 15, 2008, for a Motion to Proceed with an Adjudication of Guilt warrant for the original charge of Delivery of a Controlled Substance. During Jackson's incarceration, she had been placed in Medical cell JMOO6 for suicide watch and then had to be placed in the restraint chair due to her banging on the wall. On July 16, 2008, Jackson was transferred to Building 3 and housed in cell 3VC2 for full suicide precautions and later the same date was moved to cell 3VC1. On July 18, 2008, Jackson was re-housed to psych lockdown cell 3J01B per Dr. John Ford.

I collected all of the documentation involving Jackson as well as the Post logs and made additional copies for Major Crimes Detective Craig Smith #978, who had been assigned to the criminal investigation. I secured Jackson's property and released it to the custody of Detective Smith. I collected all of the incident reports and provided copies to Detective Smith. The following are a synopsis of the significant reports:

Officer Vicki Donnelly #4292 reported that at approximately 0510 hours she began serving breakfast trays in "I" unit and then moved to John unit. Donnelly reported that when she got to inmate Rachel Jackson, she opened the food chute, bent down, and yelled her name but inmate Jackson did not respond. Donnelly yelled her name a couple more times and inmate Jackson still did not move. Donnelly opened the cell door and called inmate Jackson's name again with no response. Donnelly had the tray server hold the door and she entered the room and shook inmate Jackson's leg and she did not move. Donnelly placed her hand on inmate Jackson's back and thought she felt inmate Jackson move so she exited the cell. Donnelly continued serving trays in "K" and "L" units and upon completion of serving trays, she informed Officer Segura that she did not get a verbal refusal from inmate Jackson. Officer Segura went to check on inmate Jackson and then called a medical emergency. Donnelly conducted emergency head counts and checked doors and remained on post until relieved by "A" shift officers.

Officer Jennifer Segura #1694 reported that she assisted with the initial counts at the beginning of the shift which were conducted at 2257 hours. Segura stated that the breakfast trays arrived on post at 0508 hours and she maintained a visual of Officer Donnelly while she served the breakfast trays. Segura was able to observe Officer Donnelly go to most of the cells, open the food chute, lean over, and it appeared Officer Donnelly attempted to talk with the inmates in the cells. Segura reported that at 0542 hours Officer Donnelly came into the control room and said everyone had been served. Segura wrote in the log book and indicated a post visual was done and the units were secured. Segura reported that when she finished writing, Officer Donnelly mentioned J01B which housed inmate Rachel Jackson and said that inmate Jackson did not respond to her attempt to wake her up for breakfast. Officer Donnelly continued to explain that she went into the cell and shook inmate Jackson but she still did not respond. Segura asked Officer Donnelly if she could tell if the inmate was breathing and Officer Donnelly responded that she shook her. Segura again asked Officer Donnelly if she could tell if the inmate was breathing and Officer Donnelly said she put her hand on the back of said inmate and could feel her breathing.

she attempted to pull on Jackson's right arm and realized that she had some stiffness in her arm, but she didn't want to assume anything because she had experienced inmates before that were taking medications that would cause them to stiffen. She stated that she could move Jackson's arm but it was noticeable that it was starting to stiffen. Segura stated that she felt for a pulse twice on Jackson's carotid artery and could not find one and that is when she called for Medical. Segura stated that when Sergeant Holmes arrived, she had asked if they needed to do CPR and was told that Jackson was dead. She stated that CPR was not performed. I asked Segura if she believed that life saving efforts would have been useless. Segura stated, "I firmly believe any life saving efforts would have been useless". She stated that it was beyond that. Segura stated that Nurse Woody Simmons estimated that Jackson had been dead between 2 and 3 hours.

On September 17, 2008, Detective Smith contacted me and advised that he had been contacted by the Medical Examiner in reference to the pending autopsy report. Detective Smith stated that the Medical Examiner had not made a ruling as to the cause of death but he had been conducting research regarding the medications. Detective Smith stated that the Medical Examiner told him that it appeared that Jackson had suffered a cardiac arrest as a combined result of the increased chemical levels found in Jackson's body and the medications she had been taking. Detective Smith stated that he was told that the chemical levels were increased by Jackson's body but the cause was not known. Detective Smith stated that the Medical Examiner stated that he was researching the effects of the elevated levels and the addition of the medication combination and he was also consulting with other experts before he made his final decision as to the cause of death.

On October 8, 2008, Detective Smith provided me with a copy of the Medical Examiner's Report. The following is the conclusion of Chief Medical Examiner David Dolinak:

Based upon the history and autopsy findings, it is my opinion that RACHEL ANNETTE JACKSON, a 21-year old woman, died as the result of complications of treatment for schizoaffective disorder. Although no convincing anatomic cause of death could be identified, the decedent began treatment with the combination of thioridazine, risperdone, and aripiprazole, each of which may increase the QTc interval. Six days before her death (7/15/08), she had documented mild electrolyte abnormalities, including hypokalemia. Four days before her death (7/17/08), she complained of rapid heart rate. It is most likely that in the setting of hypokalemia, the combination of antipsychotic medications led to a fatal dysrhythmia. As all three of the medications may rarely cause a seizure, it is also possible that she may have had a fatal seizure.

The manner of death was ruled as **Natural**.

Based upon the Medical Examiner's findings pertaining to the combination of medications, it was decided to continue the investigation and review the medical procedures.

While reviewing the medical documentation, it was learned that prior to being transported to Travis County Central Booking, Jackson was transported to Brackenridge Hospital and treated for ingestion of PCP. After arriving at Central Booking on July 15, 2008, Jackson was assessed

by the medical staff. Based on Jackson's behavior and the medical findings, Dr. Ford was contacted and he ordered that Abilify 9.75 IM be given at that time. Dr. Ford later requested Jackson's past medical records and prescribed Abilify 20mg and Risperdal 4mg for her and had her moved to psych lockdown. Documentation shows that Jackson continued to exhibit acts of aggression and she had spit in an officer's face. On July 18, 2008, Dr. Ford prescribed Mellaril for Jackson.

On October 20, 2008, I contacted Pharmacist Diana Gonzalez #4238 at the Travis County Correctional Complex and scheduled an interview for October 24, 2008. The interview is regarding the dispensing of medications.

On October 24, 2008, I met with Pharmacist Diana Gonzalez at the Correctional Complex Health Services Building for her scheduled interview. After providing Gonzalez with the Garrity Warning, the following was learned in a sworn, digitally recorded interview:

Diana Gonzalez stated that she is a licensed Pharmacist and has been employed with the Sheriff's Office since July 2007. I read the conclusion of the Medical Examiner's report regarding the autopsy of Rachel Jackson to Gonzalez and asked if she was aware of any interactions with the combination of drugs given to Jackson. Gonzalez stated that when they processed the prescription, the software that they use in the pharmacy showed a level 2 drug-drug interaction notice with Thioridazine (Mellaril) and Risperdal, meaning that the two drugs combined together could create an additive effect of the Mellaril which is known to have a prolongation of the QT interval in addition to Risperdal that can also have the same effect. She stated that although the two drugs could be taken together, there was an increased risk. Gonzalez stated that on July 15, they filled the prescriptions for the Risperdal and the Abilify and then on July 18, they filled the Mellaril. She stated that when the Mellaril was entered into the computer system, the system showed that it was a severity level 2 drug combination with the Risperdal. Gonzalez stated that the level 2 notices do not require any special actions but a level 1 interaction notice will cause a hard stop on filling the prescription and require a Pharmacist's security code to continue processing.

Gonzalez stated that at this current time, the pharmacy was only notifying the prescribing physician of the level 1 interaction notices. She stated that the Level 2 interaction notices were not maintained and she did not have the actual notice that appeared while they were processing Jackson's prescription. She stated that after she had learned of the possible cause of death, she re-entered the Risperdal and Mellaril into the system on October 10, 2008, to see if the system would notate the level 2 interactions. Gonzalez stated that the system did show the level 2 interaction. Gonzalez stated that she had printed out the notice and placed it in Jackson's file. Copies of Jackson's medication profile and the level 2 notice were placed in the case file.

After the interview Gonzalez stated that not all pharmacies used the same software to process prescriptions. She identified the software that the Travis County pharmacy uses as New Tech, and stated that it was a pharmacy database. Gonzalez stated that she contacted a friend who is a pharmacy tech employed with Wal-Mart. Gonzalez stated

that she knew Wal-Mart used a different software, so she had the same medications entered into their system and it did not show a severity level interaction for the Mellaril and Risperdal.

Later this date, I met with Dr. John Ford for an unscheduled interview. After providing Dr. Ford with the Garrity Warning, the following was learned in a sworn, digitally recorded interview:

Dr. John Ford advised that it had been a few months since he last reviewed the medical file for Rachel Jackson and he would not be able to provide accurate information specifically related to her treatment. I asked Dr. Ford if he were given the opportunity to review the file, would he be able to answer the questions. Dr. Ford acknowledged that he would be. The interview was rescheduled for October 27, 2008, to allow Dr. Ford to review the medical file.

On October 27, 2008, I traveled to the Travis County Correctional Complex and again met with Dr. John Ford. I advised Dr. Ford that he was still being afforded the Garrity protection. The following was learned in a sworn, digitally recorded interview:

Dr. John Ford advised that after reviewing the medical records for Rachel Jackson he found that she had remained agitated and difficult to manage even though she had received Abilify and Risperdal prior to and during her incarceration and even during her previous incarceration. Dr. Ford stated that he prescribed the Mellaril to help her sleep and to quiet her down from her repeated episodes of difficulty. Dr. Ford identified Abilify and Risperdal as being medications that are specifically used in the treatment of schizophrenia and similar manifestations attributed to mental illness. He stated that the difference between those two drugs and Mellaril is that Mellaril has much more of a sedating quality.

I read a portion of a Food and Drug Administration warning that was submitted July 7, 2000, that read, "*Mellaril is now indicated only for schizophrenic patients who fail to show an acceptable response to adequate courses of treatment with other antipsychotic drugs, either because of insufficient effectiveness or the inability to achieve an effective dose due to intolerable adverse effects.*" Dr. Ford stated that the Abilify and the Risperdal were not achieving homeostasis and that was a deciding factor in prescribing the Mellaril. Dr. Ford stated that it was his belief that the benefits of the Mellaril outweighed the risks. He stated that Mellaril has been in use for more than fifty years and has a well known record of calming people without adverse effects. He stated that the dosage used was 1/8 of the maximum dose recommended. He stated that the medication had the added advantage of not causing any gastrointestinal distress or discomfort. Dr. Ford stated this was a treatment that he very commonly prescribes and he has never had a death from prescribing Mellaril. Dr. Ford stated that he did not know of a specific death that occurred from Mellaril but it was clear that if you could prolong the QTc for a great enough degree, than it was possible for such to happen.

Dr. Ford stated that he read the Medical Examiner's report and found that Jackson had an 8cm by 6cm arachnoid cyst that had displaced the tissue in the left temporal lobe. He

compared the size of the cyst to the size of a baseball. Dr. Ford stated that given the size of the cyst, one would think that there would be a tremendous increase in intracranial pressure. Dr. Ford stated, "you have to squeeze a baseball size amount of brain into nothingness in order for this tumor to exist". He stated that this almost always raises intracranial pressure which is well known to cause sudden death by a variety of mechanisms including the cessation of breathing. He stated that the Medical Examiner also found some abnormalities in her lungs that might be of interest. Dr. Ford acknowledged that the abnormalities in the lungs would be consistent with the cessation of breathing.

Dr. Ford stated that the symptoms, such as the rapid heart rate that Jackson experienced, occurred during the weekend. He stated that although he was available for calls at home, he would not have been contacted for that problem due to it being a medical call and not a psychiatric call.

Investigator's Comments:

Inmate Rachel Jackson was found unresponsive inside her cell at the Travis County Correctional Complex Building 3 during the serving of breakfast. The post log reflected post visuals were being conducted within a timely manner. Travis County Sheriff's policy provides that while conducting visuals of inmates, officers must ensure that they see "a living, human body".

Officer Donnelly was responsible for conducting the post visuals but was not able to determine if Jackson was breathing and admitted that she did not look for the rise and fall of the chest. Donnelly stated that she did her visuals the same way her FTO did and stated, "you count bodies in the bed". Donnelly stated that Jackson seemed to be asleep and recalled that she was lying in her bunk on her stomach and was completely covered with a blanket and she could not see her face.

When Donnelly was at Jackson's cell to serve breakfast she called out her name several times but Jackson didn't move so she went into the cell and shook Jackson's leg and again she didn't move. Donnelly stated that she put her hand on Jackson's mid back and she felt her move like she had taken a breath. Donnelly stated that she thought Jackson was heavily medicated and didn't think anything was wrong.

Jackson began receiving treatment by Travis County Psychiatrist Dr. John Ford for a schizoaffective disorder on the first day of her incarceration. Dr. Ford prescribed Abilify and Risperdal that Jackson was known to have previously taken. Due to Jackson's continued acts of aggression and agitation, Dr. Ford prescribed Mellaril on July 18, 2008, and stated that the Abilify and the Risperdal were not achieving homeostasis and Mellaril has a well known record of calming people without adverse effects. Dr. Ford believed that the benefits of the Mellaril outweighed the risks and the dosage used was 1/8 of the maximum dose recommended. Dr. Ford commonly prescribes the treatment he had ordered for Jackson and has never had a death from prescribing Mellaril, but it was clear that if you could prolong the QTc for a great enough degree, than it was possible for such to happen. Pharmacist Diana Gonzalez explained that when filling

(WHO, WHAT, WHEN, WHERE, WHY, HOW)

At approximately 1805 inmate

Jackson, Rachel
B/F DOB 2/2/87
BKG#0833294

began banging on the window of her cell (JMOO6) with her fist. She was yelling and cussing wanting to use the telephone. She had been placed on suicide watch at approximately 1330. She continued to bang and began threatening me saying if I came in the room she would kick my ass. I instructed her to discontinue banging and she complied.

At approximately 1825 she starting banging on the window with the elbow of her right arm. She again started yelling and cussing and threatening. At 1830 she began kicking the cell door and refused verbal instruction to stop. She was then placed in the Restraint Chair at approximately 1845.

At approximately 1930 she was able to remove her right foot from the restraints. I entered the cell and secured her foot. At approximately 1941 she again was able to remove her right foot from the restraints. Myself and Officer Knight #1936 entered the cell and prepared to restrain her feet with leg cuffs. Upon entering the cell the inmate began to yell saying if we touched her she would kick our asses. She then attempted to kick me with her right leg.

I instructed her to place her leg on the floor and she refused. She then became resistive and we had to use force in order to secure her leg. Once I finished securing her left leg I stood up and she spit in my face.

She then began thrashing her body in upward motion in an attempt to free herself. So we could finish checking the restraints, I placed my hand on her shoulders to keep her in a seated position. She then began shaking her head back and forth in what I perceived as an attempt to bite me. I then placed my hand under her chin and moved her head to an upward position. The restraints were secured and we exited the cell.

Summary of How the Death Occurred:

Subject was observed lying in her cell and appeared asleep during the serving of breakfast. After showing no signs of movement, decedent was found unresponsive and determined to be deceased. Life saving efforts were not attempted due to the onset of rigor mortis. Decedent was an MHMR client and was being treated for mental disabilities at the time of death. Death was pronounced by Dr. Edward Racht.
